

South Spokane Street Viaduct Widening Project

Existing Viaduct

Viaduct Configuration After Widening

Legend

New Construction
(viaduct widening, new lane and on/off ramp)

Detour Route

Viaduct open to automobile traffic throughout construction

Improvements

- Design substantially increases traffic safety
- Increased width for all lanes
- New 4-foot shoulders in both directions
- New westbound lane on viaduct.
- New street, sidewalk and signals on lower roadway
- Enhanced earthquake resistance

Impacts During Construction

- Westbound lower Spokane St closed between Airport Way and East Marginal Way (access businesses via detour and eastbound Spokane St)
- No trucks or buses allowed eastbound on upper viaduct east of 1st Ave S
- On ramp from 1st Ave to West Seattle Freeway closed
